Office Hours: By appointment

PRESENTATION

The current business scenario is highly globalized. Organizations are no longer bound by national or continental boundaries. Moreover, globalization in the present-day context is not restricted to product supply chains alone —increasingly, organizations are sourcing global talent and capabilities. The key question for managers in such a scenario is "How can I manage people in international settings and from different cultures?". The HEC Paris Global Leadership course is premised on the development of awareness about the main challenges of leading globally in a diverse and multicultural context. Specifically, how to build a global leadership competence that can help managers understand and effectively leverage diversity. The primary objective of the course being to develop skills in order to pursue an effective global career by contributing to a more open, sustainable, innovative, and inclusive world. The course aims at developing an understanding about the challenges of interacting with and leading and managing a diverse workforce in a complex environment characterized by distance-based interactions, where differences in languages, cultures, and communication styles may be the key bottlenecks.

INTENDED LEARNING OBJECTIVES

The objectives of this module are to:
- Understand the meaning of leadership in the current globalized world and the need for leaders with a global mindset.
- Appreciate the different leadership styles that global leaders can adopt, especially in relation to the community, organization, and self.
- Learn the importance of culture and the nuanced cultural distinctions that need to be understood and leveraged by global leaders.
- Visualize cultural diversity as a strength and learn techniques to leverage it through the lens of cultural intelligence to create an innovative and effective organizational climate.
-Know the pressing challenges in the world of today and appreciate that different regions around the world may have different perspectives on seemingly similar problems.
-Critically evaluate the dimensions of leadership impact in terms of sustainability and responsibility.
-Understand that our own perspective, situation, biases, and characteristics may influence our decision making and learn techniques to manage ourselves for making better decisions in a complex globalized scenario.

KEY TOPICS

- Global leadership – what is it and its importance in the current globalized scenario.
- Understand the importance of visualizing cultural diversity as a strength rather than a bottle neck.
- Appreciate the nuanced distinctions of cultural characteristics and the associated challenges.
- Learn about 'cultural intelligence' as a tool for enhancing our cultural adaptability.
- Examine the challenges surrounding the orchestration of global virtual teams.
- Study the current global challenges in terms of sustainable development goals.
- Understand that innovation challenges in different regions are linked to their contextual priorities.
- Appreciate the importance of understanding 'self' to better contribute as a global leader.
- Learn techniques for managing stress, technostress and imbibe an inclusive mindset.

CEMS LEARNING OUTCOMES

The HEC Paris Global Leadership course aims at addressing the five CEMS MIM learning outcomes of "internationalism", "business embeddedness", "responsible citizenship", "reflective critical thinking" and "comprehensive leadership". Students will learn how leadership operates at a global level, thus answering questions related on how to lead individuals in global settings. By taking an interactive teaching style, students will learn how to embrace a contingent approach to leadership, thus enhancing their ability to activate a critical thinking approach. Specifically, the design of the course structure and delivery methodology incorporates all the five CEMS MIM learning outcomes as follows:

Internationalism: The thrust of the HEC Paris global leadership course is to appreciate the challenges and opportunities that are available to corporate leaders operating in a globalized business environment. The students in the course will work with participants from different countries to understand the contextual nuances which dictate business environments. The course is structured to provide the participants with an international learning experience and a deep understanding of local, regional, and global economic, social, political, cultural, and institutional factors to inform effective business decision-making and change management in diverse contexts.

Business Embeddedness: The instructional method in the course leverages several industry cases and mini cases, practical problem-solving challenges, application of global leadership tool kits to business and leadership situations. In addition, the participants will also have the opportunity to draw upon the experiences shared by senior corporate executives, which will help them develop the required competencies for leading in a globalized business world.

Responsible Citizenship: The HEC Paris global leadership course is premised on championing a holistic vision of responsible business decision-making, leadership and citizenship that is informed by ethical reasoning, personal integrity, respect for social diversity, commitment to success through sustainable business practices and adherence to a multi-stakeholder perspective. One of the important objectives of the course is to develop responsible leaders.

Reflective Critical Thinking: The course comprises a mix of deductive and inductive pedagogical techniques so that the learning is internalized by the participants. For example, after introducing some of the basic theoretical frameworks – participants are tasked to apply these learnings to several situations, cases, and mini cases. During the discussion, participants are expected to apply a reflective critical thinking process to come up with contextualized solutions to the practical problems described in the situations, cases, and mini cases. This critical thinking aspect of the module is aimed to equip participants to deal with novel real-life ambiguous business situations with agile and reflective decision-making skills, which are necessary for the global leaders of today.

Comprehensive Leadership: The HEC Paris Global Leadership module aims at developing leaders with a comprehensive leadership vision to understand the pros and cons of their actions not only on the business but also on the community, organization, and society at large. Through different techniques, the participants are made aware of their personal responsibility and accountability as a leader to the group, organization and society in which leadership is exerted.

COURSE MATERIAL

The course integrates interactive lectures, tutorials, cultural intelligence assessment, self-assessments, and discussions of cases. All the course material, that includes compulsory and supplementary readings, mini cases, discussion cases and assessment tools, will be provided to the participants before and during course.

TEACHING METHOD

The course is a mix of self-reflection, individual and team exercises, case study discussions, and lectures. Because the ultimate objective of the course is to make a difference in how participants visualize global leadership in their future careers, there is an emphasis on 'self-reflection' and 'critical thinking' as the primary teaching pedagogies, which will help the students internalize the learnings. Overall, the course will be organized in seminar style where the participants and teams are expected to come prepared for the sessions, having completed the self-assessments, and read the assigned readings, cases, and mini cases. There will be 10 sessions of 3 hours each.

CLASS RULES

- Before each session, please complete the required assessments and read through the assigned readings for the session included in the course material. Your preparation before coming to class will form the basis for questions and discussion during the session.
- Be on time for all classes. DO NOT enter the class if you are more than 5 minutes late.
- Attend all lectures and presentations.
- Attendance is compulsory.

Rules of Team (Group) Work

- Your team composition will be decided by the program manager/instructor.
- All teamwork will be self-policed, except in extreme circumstances.
- There will be one grade for each team, no matter how the workload is distributed among the team members.
- However, in exceptional cases, the instructor reserves the right to adjust your grade for the team presentations and project work based on how well you have worked with other team members and your contribution to teamwork.

Rules of Individual Work

- Final take home assignment is strictly individual work.
- Please ensure that you submit your assignment within the specified deadline.
- Not submitting the final take home assignment will lead to failing the course.

Rules of Class Participation

- All participation is welcome.
- In each of the sessions, some time will be devoted to discussions around issues or cases. Please come prepared.
    - All references for readings will be provided with the course material.

GRADING

The grading for the global leadership course will comprise five parts. Parts 1 to 3 are team related assessments, while 4 and 5 are individual assessments.

1. Team Action Learning Project: 25%
2. Team Presentation: 15%
3. Team Class Participation: 10%
4. Individual Final Take-Home Assignment/Exam : 40%
5. Individual Class Participation: 10%

SCHEDULE

30 hours: there will be **10** sessions of 3 hours each distributed over 5 days.

Day 1	
Morning	• Course introduction and instructions • What is Leadership? • What is Global leadership? • Global leadership: Understanding the key challenges • Mini cases and Team Exercises • Leadership: Understanding others and oneself
Afternoon	• What is Culture? • Understanding Culture: Definition and Origins • Mini cases and Team Exercises • Cultural Dimensions
Day 2	
Morning	• Cultural dimensions in action • Mini cases / Team Exercises • Discussion video case • What is Cultural Intelligence?
Afternoon	• Understanding CQ reports • Introduction to the personal action plan • Leading with Cultural Intelligence
Day 3	
Morning	• Sustainable development goals to transform the world • Leading Global Innovation • Mini cases and Team Exercises
Afternoon	• Group Presentations
Day 4	
Morning	• Virtual teams: Definition and challenges • Leading global virtual teams • Mini cases and Team Exercises • Virtual teams and Technostress
Afternoon	• Presentation and Discussion with Guest Speaker
Day 5	
Morning	• Mini cases and Team Exercises • Managing stress and technostress • Coping mechanisms • Leading mindfully and self-reflection • Emotional intelligence and empathy • Managing diversity, Bringing it all together
Afternoon	• Team Action Learning Project Presentations • Course Wrap-up

FACULTY BIOGRAPHY

Professor Shirish C. Srivastava
HEC Paris

Dr. Shirish C. Srivastava is a tenured Full Professor at HEC, Paris and an Operational Committee Member of the HI! PARIS Centre for AI and Data Science. Prior to joining HEC, Dr. Srivastava has lectured at the School of Business, National University of Singapore and holds a Ph.D. from the same university. He is an alumnus of the International Teachers Program, (ITP) from the Kellogg School of Management, Northwestern University and is a certified senior Cultural Intelligence (CQ) facilitator from The Cultural Intelligence Centre, Michigan, USA. He has also completed his habilitation à diriger des recherches (HDR) from Université de Lorraine, France. At HEC, he teaches in the Masters, Doctoral, Executive MBA and Custom Executive Education Programs. His rich experience includes coaching C-Level and senior government/business executives on issues related to managing technology, cross-cultural adaptation, digital transformation, data & artificial intelligence, social media strategy, global leadership, and cross-border business relationships.

His research has been published in several top journals such as *MIS Quarterly (MISQ), Information Systems Research (ISR), Journal of Management Information Systems (JMIS), Research Policy (RP), Journal of the Association for Information Systems (JAIS), European Journal of Information Systems (EJIS), Information Systems Journal (ISJ), Journal of Strategic Information Systems (JSIS), Journal of Information Technology (JIT),* and *MIS Quarterly Executive (MISQE),* among others. He has also authored several book chapters. He currently serves as a Senior Editor at the *Journal of the Association for Information Systems (JAIS)* and *the European Journal of Information Systems (EJIS),* an Editorial Board Member at the *Journal of Management Information Systems (JMIS)* and an Associate Editor at the *Information Systems Research (ISR)*. Dr. Srivastava is widely traveled and has spoken at various forums in several countries across the globe including - Australia, Azerbaijan, Belgium, Brazil, Bhutan, Cambodia, Canada, China, Croatia, Cyprus, Denmark, Estonia, Finland, France, Germany, Greece, Iceland, India, Ireland, Italy, Japan, Kuwait, Lithuania, Malaysia, Mexico, Netherlands, New Zealand, Norway, Peru, Portugal, Qatar, Romania, Saudi Arabia, Spain, Singapore, Slovenia, Sweden, Switzerland, Thailand, Turkey, U.A.E., U.K., U.S.A., and Vietnam.

He has thrice been nominated for the prestigious Carolyn Dexter Award at the Academy of Management (AOM) Meetings 2005, 2007 and 2008 and was a finalist for the award at AOM 2007. He was nominated for the academy wide William H. Newman award at the AOM 2009, Chicago and is the winner of the Gerardine DeSanctis Dissertation Award for the best doctoral dissertation paper in organizational communication and information systems in the same year. He was again nominated for the William H. Newman award at AOM 2012, Boston by the international management division. He has also been a winner at the Society for Information Management (SIM) Paper Awards Competition, 2007. He has recently been awarded the *Journal of the Association for Information Systems (JAIS)* best published paper award for 2023. He is a four-time winner of the Prix Académique de la Recherche en Management, 2013, 2015, 2016 and 2022 at Paris, France. His research interests include socio-technical aspects of artificial intelligence, opensource, social media strategy, e-government, services sourcing, and technology enabled innovation.

BUSINESS, GEOPOLITICS AND THE CHANGING GLOBAL ENVIRONMENT

Enseignant(s) / Teacher(s): Jeremy Ghez

Durée (en heures) **/ Duration** (in hours): 18h

Nombre de crédits ECTS / Number of ECTS credits: 3

Niveau / Education Level	Période / Period	Langue d'enseignement / Language of instruction	Effectif max / Max. class size	Mode / Teaching Mode
M2 & MS & MsC	S2	English	45	In-Person

Prérequis / Prerequisites:

Basic understanding of business concepts, in particular as they relate to economics, strategy and leadership.

SYNOPSIS / OVERVIEW

This class is designed to provide participants with a toolbox that can help them navigate an increasingly hotter, crowded, polarized and unstable global environment – and to help them surf on the political, economic, business, social and environmental transformations of the next decade.

OBJECTIFS PEDAGOGIQUES / LEARNING OUTCOMES

1. Identify key global dynamics shaping your business environment;
2. Anticipate future dynamics shaping the business environment in a wide range of areas;
3. Rethink and reinvent your business model accordingly;
4. Reconcile business strategy with ever-more pressing global challenges;
5. Determine what this means for you as a business leader;
6. Develop a long-term, consistent strategy and vision, beyond mere day-to-day tactics.

DESCRIPTION DETAILLEE / DETAILED DESCRIPTION

Thèmes-clés / Key Topics:

- Global forces shaping the business environment: geopolitical rivalries, global cooperation, inequalities, identity, technology and climate change;
- Risk and uncertainty: What we know we know, what we know we don't know; the merits of asking great questions and the virtues of recognizing that sometimes, you cannot; strategic surprises;
- Scenario-planning and anticipation;
- Creativity, diversity and the art of generating new ideas.

Organisation du cours – plan détaillé / Course organization – detailed outline:

Class 1: Global Trends and the Current Business Environment

This introduction will give you a brief overview of the current business environment, and the megatrends shaping it.

Class 2: Time For A Quantum Leap

This exercise will introduce participants to (or help them get reacquainted with) the global business environment's radical uncertainty. How to tackle it? What to do about it?

Class 3: The World We Live In (online and asynchronous)

What forces shape the business environment? This activity will lead you to explore six driving forces, namely: geopolitical rivalries, global cooperation, inequalities, identity, climate change and technology.

Assignment 1: The World of Your Actor

Class 4: Being analytical in a dogmatic world

In this class, we'll discuss what it takes to do business in a fractured and polarized environment.

Class 5: Scenario-Analysis and Anticipation (online and asynchronous)

What's driving the future? In this online activity, you'll learn to build mutually exclusive scenarios that provide you with a map of the future, one that helps you better anticipate future change and adapt accordingly.

Class 6: Imagine, strategically

We'll explore in this section how actors can remain creative in an uncertain and unstable environment. We'll also consider whether there's a human factor in our conversation: Can individuals make a difference in the wake of mega-trends?

Assignment 2: A Long-Term Strategy for Your Actor

BIOGRAPHIE(S) / BIOGRAPHY

Jeremy Ghez is a professor of Economics and International Affairs (Education Track) at HEC Paris. He is the academic director of the Sustainable and Disruptive Innovation Track in the HEC Paris MBA program and of the HEC Paris Center for Geopolitics. He was the previous scientific director of the school's master program in Sustainability and Social Innovation. His research and teaching focuses on managerial economics, the global business environment, strategic foresight, tech giants, as well as on US and European politics. Previously, he was an assistant policy analyst and a research fellow at the RAND Corporation and at RAND Europe. In 2016, he received an award his case study on "The Economics of Amazon." In 2019, he was named one of the world's 40 best under-40 MBA professors by Poets and Quants and in 2021, he received the Pierre Vernimmen prize for his teaching. His book, Architects of Change: Designing Strategies for a Turbulent Business Environment, was

published last September by Palgrave MacMillan. He has appeared on Bloomberg, the BBC and France 24, as well as on various French media.

DIVERSITY, EQUITY AND INCLUSIVENESS (DEI)

Teacher(s): Matteo M. Winkler

Duration (in hours): 18h

Number of ECTS credits: 3

Education Level	Period	Language of instruction	Max. Staffing	Teaching Mode
M2 & MS & MsC	S2	English	54	In-Person

Prerequisites: No prerequisites required.

OVERVIEW

Does it still make sense to teach diversity, equity and inclusiveness after the dramatic policy shift that has occurred in the United States, and in turn ricocheted in Europe and globally, after President Trump's inauguration in early 2025? At HEC Paris, we believe in nurturing not just high-performing students but responsible global citizens committed to building a more just and sustainable society. For this purpose, this course, in collaboration with a **corporate partner** (last year it was **Capgemini**), develops your critical thinking to understand diversity dynamics and drive meaningful inclusion in our communities and workplaces, including an understanding of the current policy shifts, repositioning and reframing of DEI conversations. In class, we will explore key DEI concepts through real-world cases, literature insights, and actionable strategies to foster equity, prevent conflict, and become a catalyst for positive change.

Core notions of this course are:

- **Diversity**: Embracing various identities, experiences, and expertise beyond mere representation.
- **Equity**: Promoting fair access to resources, opportunities, and participation for all.
- **Inclusiveness**: Valuing differences to enhance collaboration, innovation, and decision-making.

Session by session, we will also delve into critical topics such as racism, privilege, feminism, patriarchy, imperialism, and colonialism, equipping you to engage with complex realities, challenge exclusionary norms, and lead inclusively. Recent geopolitical developments will also be addressed. The final assignment with the corporate partner will add practical insights.

LEARNING OUTCOMES

At the end of this course, students will have:

- Acquired a basic understanding of the implications of diversity in societies characterized by pluralism and heterogeneity (*internationalism*).

- Fostered a critical awareness of the key socio-political issues faced by today's leaders (*comprehensive leadership*).
- Been offered a theoretically solid analytical framework regarding the current issues surrounding equal opportunities and inclusion (*reflective critical thinking*).
- Developed the basic management skills necessary to effectively lead organizations in today's globalized business environment (business embeddedness).
- Learned to have conversations about differences in an appropriate manner (*responsible citizenship*).

In a professional situation, students will be able to:

- Substantially and actively contribute to conversations relating to DEI within a company.
- Understand issues regarding D&I and propose meaningful strategies and solutions to leverage the diversity bonus.
- Lead discussions by avoiding conflicts.

DETAILED DESCRIPTION

Key Topics:

As a distinguishing element of this course, the students are required to prepare a group assignment together with a corporate partner (CP). Past CPs were **Deloitte, EY, Cartier, L'Oréal, Salesforce, AB Inbev, and Capgemini**. The work of each student team will be assessed based on a presentation in front of a jury with the participation of both corporate partners and HEC Faculty and the Chief Diversity Officer.

Organisation du cours – plan détaillé / Course organization - detailed outline:

6 sessions of 3 hours, once per week during one bimester

- Session 1: Introduction to DEI
- Session 2: The case for DEI and the diversity bonus
- Session 3: Understanding discrimination
- Session 4: Gender(s) and sexual orientations
- Session 5: Neuro-diversities
- Session 6: Student presentations

ESG-related content (Environmental – Social – Governance):

Environmental-related content	Social-related content	Governance-related content
2. Moderate content	4. Extensive content	3. Significant content

Competency Goals:

Transformative Management	Innovative Thinking & Problem Solving	Positive Leadership	Sustainable Business Practises
3. Significant contribution	3. Significant contribution	3. Significant contribution	3. Significant contribution

TEACHING MATERIALS

An updated bibliography will be provided one week before the start of the course. The pre-readings will be posted on Blackboard in advance.

TEACHING METHODS

Every session is structured around the **flipped classroom model**: students are required to read the materials before the session and then present their reflections in class for discussion. The course also includes sessions with special guests from the academic and corporate world. Neither the materials nor the discussions in class require any prior knowledge of the subject. In-class sessions are highly interactive, and some teamwork may be graded or ranked. The last session contemplates student presentations at the corporate partner's offices.

WORK AND EVALUATIONS

Outils / support / mode d'évaluation Tool/method of evaluation	Durée et format Duration	Pondération dans la notation finale Weight in the final grading
In-class active participation		*30%*
Individual assignment (reflective paper)		*30%*
Team assignment (teamwork with the corporate partner)		*40%*

Additional details:

The **individual assignment** (reflective paper) consists of a 2-page paper on a topic assigned by the instructor. Your grade will improve if you show a connection with in-class learning and share personal experiences. The instructor will provide individual feedback for this assignment.

The **team assignment** will be managed directly by the corporate partner. Further instructions in this respect will be provided during the first session. This assignment is engaging and allows you to delve into the corporate partner's policies, teamwork, and practices. The deliverables consist of a presentation to be delivered before a jury in session 6 and a concise written report synthesizing your findings and recommendations.

BIOGRAPHY

A graduate from Bocconi (PhD) and Yale (LLM) and associate professor at the Law Department of HEC, **Matteo Winkler** (he/his) is an internationally recognized scholar in the rights of lesbian, gay, bisexual, transgender and intersex people and other sexual minorities (LGBTI+). In his home country, Italy, legislators have used his works to pass new regulations concerning same-sex families and hate speech. His last articles touch upon the criminalization of sexual minorities around the world *vis-à-vis* human rights law. For his research on these topics, in 2019 he was

awarded the Role Models LGBT+ Leaders prize by the French not-for-profit organization l'Autre Cercle. At HEC Paris, he is the academic director of CEMS.

CHARGE DE TRAVAIL ESTIMEE / ESTIMATED WORKLOAD

Each session requires 1 to 2 hours of preparation. Depending on the content, the individual assignment requires around 1 day of work, and the team assignment requires 2 to 3 days, excluding contacts and meetings with the CP.

Firms' Accounts, M&A and Restructuring

Enseignant(s) / Teacher(s): Olivier LEVYNE and Hervé STOLOWY

Durée (en heures) **/ Duration** (in hours): 18h

Nombre de crédits ECTS / Number of ECTS credits: 3

Niveau / Education Level	Période / Period	Langue d'enseignement / Language of instruction	Effectif max / Max. class size	Mode / Teaching Mode
M2 & MS & MsC	S2	English	54	In-Person

Prérequis / Prerequisites: (in particular, for level 2, if a level 1 is required, please indicate it)

There is no specific requisite for this course, beyond mandatory courses in Master 1 program.

A document, prepared by the professors, is especially provided before the first course for beginners in accounting.

SYNOPSIS / OVERVIEW

This course complements the Investment Banking course for 4 reasons:

1. It provides the fundamental accounting principles that enable to bring added value on a transaction
2. It deals with restructurings that involve M&A and ECM specialists
3. It enables an understanding of banks accounts and details their intrinsic valuation for a M&A deal
4. It includes cases around accounting fraud

OBJECTIFS PEDAGOGIQUES / LEARNING OUTCOMES

At the end of the course, students will be able to

1. Build IFRS accounts of corporate entities
2. Analyze banks' accounts and prepare their valuation based on a Dividend Discount Model
3. Propose restructurings based on equitization and debt reinstatement
4. Understand what an accounting fraud is

BIOGRAPHIE(S) / BIOGRAPHY

Olivier Levyne has been teaching at HEC since 2007 and has held the position of Affiliate Professor from 2013 to 2023. He joined the Education Track Faculty, as an Associate Professor within the Accounting and Control department, in 2024.

He has more than 30 years of experience in Investment Banking, initially in the Mergers and Acquisitions field, then as a Managing Director at CACIB, in charge of M&A and ECM operations within the financial institutions sector.

His teaching primarily revolves around financial accounting, management accounting, corporate finance, the market for control, Leveraged Buyouts (LBOs), financial and real options. He is responsible for teaching modules in the AFM, MEF, MAC and CEMS programs. He is also the Academic Director of the L'Oréal Academy, dedicated to Corporate Growth Fueled by Deals with Private Equity Funds and of several HEC Summer Programs.

Olivier holds a degree from ESCP, a PhD in Economic Science and an Habilitation to Supervise Research (HDR) in Management Science; he has also been Qualified as a University Professor. He is an Officer of the Academic Palms. Married and a father of two daughters, he is 58 years old

Hervé Stolowy is a Professor of accounting at HEC Paris. He holds a Degree in Business Administration (ESCP – Paris), a Masters' degree in Law (University Paris-Val de Marne), a B.A. in Russian and American Studies (University Paris-Sorbonne), a Ph.D. in Financial Accounting (University Paris-Panthéon-Sorbonne) and an "Habilitation à Diriger des Recherches" ("Qualified Doctoral Dissertation Supervisor"). He is a certified "expert comptable" (French equivalent of a chartered accountant or certified public accountant).

He has authored and co-authored nine books (including "Financial Accounting and Reporting – A Global Perspective", Cengage Learning, Andover, UK, 7th edition, 2024, in collaboration with Yuan Ding and Luc Paugam), chapters in 10 collective works and published over 65 articles in academic and applied journals (incl. Abacus, Accounting Auditing & Accountability Journal, Accounting, Organizations and Society, Comptabilité – Contrôle – Audit, Contemporary Accounting Research, European Accounting Review, Finance – Contrôle – Stratégie, Journal of International Business Studies, The International Journal of Accounting, Issues in Accounting Education, Journal of Accounting and Public Policy, Strategic Management Journal). His research and teaching interests focus more specifically on accounting fraud, whistleblowers and short sellers, intangibles, non-financial information and international accounting harmonization. He is a past president of AFC, a past co-editor of Comptabilité – Contrôle – Audit, the official journal of the AFC and a past chair of the Standing Scientific Committee of the EAA, and a past Editor of the European Accounting Review, the official journal of the European Accounting Association.

Hervé Stolowy teaches financial accounting in the different graduate programs of HEC Paris: introduction to financial accounting and reporting (HEC-MBA Program, HEC-EMBA Program and HEC Master of Science in Management – Grande Ecole).

CHARGE DE TRAVAIL ESTIMEE / ESTIMATED WORKLOAD

18 hours

PLANNING / SCHEDULE * **MBA only*

International Impact Investing: Cross-National Strategies for Social and Environmental Change

Enseignant(s) / Teacher(s): Elie MATTA

Durée (en heures) **/ Duration** (in hours): 18h

Nombre de crédits ECTS / Number of ECTS credits: 3

Niveau / Education Level	Période / Period	Langue d'enseignement / Language of instruction	Effectif max / Max. class size	Mode / Teaching Mode
M2 & MS & MsC	S2	English	45	In-Person

Prérequis / Prerequisites: (in particular, for level 2, if a level 1 is required, please indicate it)

Foundations in finance, strategy, or corporate social responsibility preferred. Basic understanding of investment concepts recommended.

SYNOPSIS / OVERVIEW

Impact investing seeks to generate both financial returns and measurable social or environmental impact. This course offers an applied, case-based exploration of international impact investing, moving from the historical foundations of global CSR practices to the detailed processes of impact vetting, due diligence, and financing mechanisms such as impact bonds and green/blue bonds. Students will engage deeply with real-world dilemmas faced by international investors, analyzing investment opportunities across diverse national contexts.

OBJECTIFS PEDAGOGIQUES / LEARNING OUTCOMES

1. Understand the international evolution from CSR to impact investing and distinguish impact investing from related concepts (ESG, philanthropy, traditional finance).

2. Apply frameworks for vetting and conducting due diligence on international impact investment opportunities.

3. Analyze and evaluate impact bonds (DIBs, SIBs) and green/social/sustainability/blue bonds in an international context.

DESCRIPTION DETAILLEE / DETAILED DESCRIPTION

Thèmes-clés / Key Topics:

- Evolution from CSR to Impact Investing
- Core concepts of Impact Investing
- International impact measurement and challenges
- Due diligence for cross-national investments
- Development Impact Bonds (DIBs) and Social Impact Bonds (SIBs)
- Green, Social, Sustainability, and Blue Bonds (GSS+)

Organisation du cours – plan détaillé / Course organization – detailed outline:

Day	Morning Session	Afternoon Session
Day 1	**International CSR: From Corporate Philanthropy to Strategic Impact** *Case: The Hershey Company: Broken Pledge to Stop Using Child Labour (Ivey Publishing W25254)* This case examines Hershey's failure to eradicate child labor in its supply chain despite public commitments, highlighting the challenges of international CSR, supply chain transparency, and corporate accountability across borders. It sets the foundation for understanding the limitations of CSR and the emergence of impact investing.	**Introduction to Impact Investing: Definitions, Global Contexts, and Early Dilemmas** *Case: Acumen Fund: Measurement in Impact Investing (A) (HBS Case 9-310-011)* Acumen Fund must decide whether to invest in two ventures in Kenya. The case highlights the challenges of balancing social impact and financial returns when investing internationally.
Day 2	**Impact Investing Decision-Making: Vetting and Selecting International Projects** *Case: Finance for a Sustainable Society at Triodos Investment Management: An ESG Portfolio Investment Decision (IMD-7-2309)* Triodos Investment Management must decide whether to invest in, engage with, or exclude three controversial international companies. The case highlights the application of ESG frameworks in cross-national investment decisions. It illustrates the complexity of building a sustainable, internationally diversified impact portfolio.	**Due Diligence for Cross-National Impact Investments** *Case: From Grease to Green: Impact Investing Due Diligence on ZhanaSolutions (IMD-7-2518)* AlphaMundi Group evaluates whether to invest in ZhanaSolutions, a Colombian start-up providing grease waste management technology. The case highlights risk assessment, scenario modeling, and the structuring of debt instruments for impact investing.
Day 3	Development Impact Bonds and Social Impact Bonds: International Cases *Case: Paying to Improve Girls' Education: India's First Development Impact Bond (HKS Case 2155.0)* This case describes the design and negotiation of India's first Development Impact Bond (DIB), aimed at improving girls' education outcomes in rural Rajasthan. Key stakeholders must align on evaluation design, risk sharing, and payment terms. It highlights the challenges of structuring performance-based finance in international development contexts.	Green, Social, Sustainability, and Blue Bonds: Cross-National Trends and Challenges *Case: Nuveen and the Seychelles Blue Bond: Analyzing a Public Fixed Income Impact Investment (SI163)* Nuveen, a major fixed-income investor, must evaluate whether to invest in the Seychelles' pioneering Blue Bond to support marine conservation. The case highlights the challenges of assessing sovereign risk, blended finance structures, and impact measurability in a small emerging economy. It explores the evolution from traditional bonds to performance-tied impact bonds in international markets.

Individual Case Analysis (Cases 3, 4, 5 or 6)	*You will submit one individual case analysis. It is to be submitted before the start of the session in which the case is discussed.* *Each analysis should be 2–3 pages, single-spaced, and must include:* *1. A brief sizing up of the situation* *2. Problem analysis* *3. Alternatives considered* *4. Decision criteria used* *5. A final recommendation* *Late submissions will not be accepted without prior approval.*	*30%*
Group Project (due 2 weeks after the last session)	*You will work in teams of 4–5 students to analyze one international impact fund investment. Each group will select an investment case, assess its impact strategy, financial approach, and international challenges. The final deliverable is a 4–5 page, single-spaced report summarizing the analysis and providing a recommendation.* *Late submissions will not be accepted without prior approval.*	*40%*

BIOGRAPHIE(S) / BIOGRAPHY

Elie MATTA is Associate Professor of Management at HEC Paris. He completed a PhD in Management at the Ivey School of Business, Canada.

He teaches Impact Investing, Leadership, and Performance Management in the MSc, MBA, PhD, and Executive Programs. He has served as the Academic Coordinator of the Managerial Competencies in the HEC MSc Programs (2010-2015), the Program Director of the HEC-Oxford Executive Master in Consulting and Coaching for Change (2013-2015), Chair of the Department of Management and Human Resources (2015, 2018-2022) and Director of the Executive MSc in General Management (2017-2022). He also served as Associate Dean in charge of the PhD Program at HEC Paris and as Deputy Director of the Social Sciences and Humanities Doctoral School of University of Paris-Saclay (2016 and 2017).

His research focuses on CEOs, risk, compensation, and decision making. His work has appeared in the leading academic journals Academy of Management Journal, Organization Science, and Strategic Management Journal. He regularly presents his research in international academic conferences and industry events. He serves as an ad hoc reviewer for numerous academic journals and research grant foundations and is a member of the Editorial Board of the Academy of Management Journal since 2011.

He has received various research awards including the J. Armand Bombardier PhD Fellowship in Global Management, the University of Western Ontario Plan for Excellence Award, and the Emerald Management Reviews Citation of Excellence Award. He is listed since 2010 in the Who's Who in the World (management academia). He was awarded in 2010 and in 2012 the Commission of European Management Schools' Course of the Year Award for his course "Managing Global Complexity." He received in 2015 the Academy of Management Journal Best Reviewer Award.

INVESTMENT BANKING

Enseignant(s) / Teacher(s): Olivier LEVYNE

Mobile/Whatsapp: 33 7 83 35 67 65; Mail: levyne@hec.fr

Durée (en heures) **/ Duration** (in hours): 30h

Nombre de crédits ECTS / Number of ECTS credits: 5

Niveau / Education Level	Période / Period	Langue d'enseignement / Language of instruction	Effectif max / Max. class size	Mode / Teaching Mode
M2 & MS & MsC	S2	English	70	In-Person

Prérequis / Prerequisites: (in particular, for level 2, if a level 1 is required, please indicate it)

No prerequisite for this course

SYNOPSIS / OVERVIEW

This course provides a comprehensive presentation of vital principles to deal with investment banking operations: valuation and price, type of buyer for a M&A deal (corporate player versus financial sponsor), structure of a M&A deal, ECM products (IPO, capital increase, convertible bonds issue)

Each financial principle is duly justified and applied to a potential transaction.

OBJECTIFS PEDAGOGIQUES / LEARNING OUTCOMES

At the end of the course, the student will have the following capabilities:

1. Structuring of a M&A deal: valuation of the target, proposed price and payment modalities, choice between a strategic deal with an industrial player and a financial deal with a private equity fund
2. Optimization of the buyer's financial structure thanks to ECM products

DESCRIPTION DETAILLEE / DETAILED DESCRIPTION

LUXURY MANAGEMENT

Teacher(s):

Duration (in hours): 18h **Number of ECTS credits**: 3

Education Level	Period	Language of instruction	Max. Staffing	Teaching Mode
M2 & MS & MsC & MAS	S2	English	54	IN-PERSON

Deanship Department: MARKETING **Domain:** STRATEGY, MANAGEMENT, MARKETING

Track (within a master): CEMS

Course family (skills addressed, asked by French CEFDG): Strategic Management (RNCP 35909)

Keywords (maximum 5, for website): LUXURY MANAGEMENT BRANDING SUSTAINABILITY

SYNOPSIS

This course is designed for participants who show:

- a curiosity to learn and understand the luxury business model
- an interest for different ways of doing business
- a taste for refined goods and services

It introduces them to key concepts and principles of luxury management. The curriculum starts out with an in-depth understanding of luxury, its role in society and the key principles defining it. There is a particular focus on luxury brand management as well as the strategic perspectives and challenges for luxury brands in today's world. To end this course, and to implement its key learnings, students will hand-in a final paper providing their vision for a luxury brand of their choice.

Understanding the soul of these iconic brands is key to manage them well. I met many successful executives and what they all have in common, beyond their exceptional skills, is their passion and a deeply anchored understanding of the intangibles of these luxury brands. This course does not pretend to be a fully comprehensive luxury management course. Instead, it provides one approach, mostly based on French luxury brands examples, which differ from the Italian or American or Asian vision. It aims at inspiring you to develop your own vision and your own style. Hopefully, this is what this course will encourage you to do with a variety of teaching tools.

DETAILED DESCRIPTION

Prerequisites: n.a.

Course overview (executive summary): **Brand Value, Strategy, Experience and Societal Engagement in Luxury.**

Luxury is never just about products. In today's landscape, it is as much about business models as it is about meaning. It is about the dreams, emotions, and values that brands create and sustain over time, but also about how they transform these into high-performing, global enterprises. This course explores the world of luxury strategy, where heritage meets innovation, and where brands craft not only objects, but also symbols, stories, and increasingly, ecosystems of experiences that resonate deeply with individuals and societies.

We begin by uncovering how luxury brands generate value beyond functionality — shaping desire, elevating everyday life, and transforming products into powerful markers of identity and belonging. At the same time, we

analyze how this symbolic power translates into economic performance in a highly competitive and increasingly polarized market, where a small share of top clients drives a disproportionate part of growth.

From there, we explore how luxury brands become enduring strategic assets: living heritages with strong creative visions, products that embody excellence and craftsmanship, and portfolios that balance exclusivity with scale. We examine how leading Maisons evolve into cultural and business platforms, expanding into new categories such as hospitality, experiences, and services. In a context where growth requires constant renewal, we study the art of brand extension and ecosystem development, managing the tension between innovation and coherence, and learning from both successes and strategic missteps.

We examine the orchestration of client, product, and brand moments, and how companies leverage data, technology, and human expertise to create highly personalized and memorable experiences. From clienteling to immersive environments, from limited editions to curated journeys, luxury increasingly operates as an experience-driven industry, where emotional engagement is a key driver of loyalty and long-term value.

Finally, the course looks outward, to the broader role of luxury in society. Today's leading brands are expected not only to inspire, but also to take responsibility (environmentally, socially, and culturally). We move beyond the question of whether sustainability and luxury can coexist, and instead analyze how they are becoming structurally intertwined. We explore how forward-looking Maisons rethink sourcing, production, and growth models, and how authenticity, transparency, and impact are emerging as new dimensions of desirability.

This course offers a 360° immersion into luxury strategy, from value creation to growth, from heritage to transformation, from exceptional experiences to societal impact. It equips students not only with analytical tools, but with a deeper understanding of how luxury brands remain at the forefront of innovation, shaping both markets and culture in a rapidly evolving world.

Principal Items:

Session 1. Delivering value in luxury

This session focuses on understanding how to create and communicate value in luxury. It covers the principles of luxury economics, including the significance of exclusivity, craftsmanship, and heritage. Key topics include:

- Defining luxury and its emotional and symbolic resonance with consumers.
- Strategies for distributing, communicating and pricing luxury products.
- Case study of successful luxury brands and their value propositions.

Case study. Rimowa

Session 2. Mastering the brand platform and portfolio management

In this session, participants learn about building and sustaining a luxury brand platform. The focus will be on:

- Brand identity development and positioning.
- Portfolio management strategies for luxury brands, including extending brand lines without diluting exclusivity.
- Understanding extraordinary consumers.

Case study. Mao Geping

Session 3. Experience, an essential asset

This session emphasizes the importance of customer experience in luxury management, including:

- The role of sensory marketing and emotional engagement in luxury experiences.
- Designing immersive brand experiences that resonate with consumers.
- Importance of both online and offline customer journeys in shaping luxury perceptions.
- Best practices for creating memorable and impactful customer touchpoints.

Session 4. Luxury & crafts

Focusing on the craftsmanship behind luxury goods, this session explores:

- The relationship between traditional craftsmanship and modern luxury branding.
- Challenges in scaling artisan practices while maintaining quality.
- Supply chain considerations and specific strategies in the luxury sector.
- Sustainability considerations within the craft of luxury production.

Case study. Lustrerie Matthieu.

Session 5. Engaged luxury

This session highlights the concepts of social responsibility and customer engagement in luxury brands. Discussion includes:

- The rise of ethical luxury and drivers related to the specific essence of luxury.
- Consumers' expectations for engagement.
- Case studies of luxury brands that successfully integrate environmental and social engagement into their business models.

Session 6. Evaluation and wrap up

Project for Final Grade:

Adapting Luxury Activities and Business Models for a Sustainability-Oriented Environment

Project Overview:

In today's rapidly evolving marketplace, sustainability becomes an essential factor to consider for companies to operate in all sectors, including luxury. Known for its heritage and exclusivity, the luxury sector faces both challenges and opportunities in adapting to this shift towards sustainability. This project encourages to explore strategies that luxury brands can implement to embrace sustainability in their overall business models.

Objectives:

- Investigate current trends and consumer attitudes toward sustainability in the luxury market.
- Critically analyze existing business models and identify areas for adaptation and improvement.
- Develop a comprehensive framework for integrating sustainability into strategies.
- Propose specific actions, and consumer engagement initiatives to turn brands into sustainability leaders.

Deliverables:

A ppt document including the full proposition for a 10 min presentation
A short video (2 to 3 min MAX) pitching your project

Pedagogical Objectives:

- **Achieve** familiarity with the luxury sector, its products and services.
- **Understand** the key specificities of the luxury business in terms of managerial practices.
- **Apply** the key management principles in the luxury industry to make appropriate business decisions.
- **Describe and analyze** the characteristics of a luxury brand and get a sense of the prerequisites to be able to build one over time.
- **Develop and formulate** a luxury strategy based on the offering's characteristics and market opportunities.

Skills:

Participants will have developed a robust skill set that empowers them to navigate the luxury industry in a global context.

1. Luxury Brand Analysis: Ability to identify and articulate key characteristics of luxury products and brands, and analyze their market differentiation from premium goods.
2. Consumer Insight and Behavior: Skills in categorizing luxury consumption motivations and understanding cross-cultural perceptions to enhance brand strategy and consumer engagement.

3. Strategic Brand Management: Proficiency in developing and managing luxury brand strategies, including brand positioning, pricing tiers, and evaluating brand extensions.
4. Customer Journey Mapping: Ability to design and optimize customer journeys across multiple touchpoints, ensuring meaningful and immersive brand experiences.
5. Creative and Business Integration: Skills to balance creative aspirations with business objectives.

Course organization - detailed outline: (Number of sessions with their duration and content in order)

Session 1	Monday 22/02/2027	09H40-12H50	Rimowa case
Session 2	Monday 22/02/2027	14H40-17H50	Mao Geping case
Session 3	Wednesday 24/02/2027	08H00-11H10	
Session 4	Thursday 25/02/2027	13H00-16H10	Mathieu case
Session 5	Monday 08/03/2027	14H40-17H50	
Session 6	Thursday 11/03/2027	13H00-16H10	Final Project

TEACHING MATERIALS

See online content.

TEACHING METHODS

This course is a face-to-face course blended with asynchronous content including videos quizzes and readings, for augmented learning. Videos should help remember the key concepts of the course while face-to-face sessions are dedicated to deepening the content, discussing cases and research questions.

WORK AND EVALUATIONS

Work requested:

The course evaluation will be made up of:

- Online quizzes – individual assignment (automatic evaluation)
- A consulting report – ppt/word format – individual assignment (professor's evaluation)

Assessment of achievement:

Tool/method of evaluation	Duration	Weight in the final grading
Final presentation and report	10 min presentation + pitch in video	50%
Online quizzes	3-4h of online content	50%
Participation	In-class	bonus

BIOGRAPHY

Anne Michaut received a Ph.D. in Social Sciences from Wageningen University, where she also received a M.Sc. degree in Marketing and Consumer Behavior. She also holds an agronomics engineering degree. Prior to joining HEC, she worked on innovation process methods at Unilever, which funded her PhD research. Her research expertise is in new product management and focuses on new product adoption processes, barriers to adoption and adoption facilitators. More recently she developed expertise in the field of luxury, focusing on sustainable development and entrepreneurship in luxury.

At HEC, she teaches in the Grande Ecole, MBA, Executive MBA, and Executive Education programs. Her teaching focuses on Luxury Management. Academic director of the LVMH Chair, Anne Michaut also is Associate Dean for Pedagogy at HEC Paris.

The Mega Trends

Enseignant(s) / Teacher(s): Prof. Joseph Nehme

Durée (en heures) **/ Duration** (in hours): 18h

Nombre de crédits ECTS / Number of ECTS credits: 3

Niveau / Education Level	Période / Period	Langue d'enseignement / Language of instruction	Effectif max / Max. class size	Mode / Teaching Mode
M2 & MS & MsC	S2	English	30	In-Person

Prérequis / Prerequisites: No Prerequisites

SYNOPSIS / OVERVIEW

This syllabus is designed for today's rapidly evolving global environment. It draws on several leading international trend reports. Together, these sources provide a comprehensive view of the forces reshaping economies, industries, governments, and societies worldwide.

These reports highlight a world increasingly shaped by advances in artificial intelligence and digital technologies, the climate and energy transition, geoeconomic fragmentation, demographic shifts, workforce transformation, and growing institutional uncertainty. Organizations across sectors are being challenged to rethink their strategies, business models, leadership approaches, and capabilities in response to these interconnected developments.

The course examines today's major megatrends and explores their implications for business, public policy, and society. Particular emphasis is placed on the climate and energy transition, as well as technological and AI-driven transformation, while also considering the broader economic, social, and geopolitical forces that influence decision-making and supply chains in an increasingly complex and uncertain world. Through cases, discussions, and scenario-based analysis, participants will develop the ability to understand emerging trends, assess their potential impact, and identify strategic opportunities and risks.

OBJECTIFS PEDAGOGIQUES / LEARNING OUTCOMES

By the end of this course, participants will be able to:

1. Explain the major global mega trends shaping business, society, government, and daily life.
2. Distinguish between short-term hype, structural change, and long-term transformation.
3. Analyze the opportunities, risks, and ethical dilemmas created by each mega trend.
4. Use basic foresight tools such as trend mapping, scenario building, and strategic implications analysis.
5. Develop a practical response plan for an organization, community, or sector affected by mega trends.

DESCRIPTION DETAILLEE / DETAILED DESCRIPTION

Thèmes-clés / Key Topics:

Course organization – detailed outline:

Session 1 — Understanding Mega Trends and Global Risk

Theme: What makes a trend "mega," and why do mega trends matter?

Objectives

Participants will understand the difference between a fad, trend, weak signal, disruption, and mega trend. They will also learn how to interpret global risk reports and trend frameworks.

Key topics

- What is a mega trend?
- Difference between linear change and exponential change.
- Global risks: economic confrontation, conflict, climate instability, technological disruption, misinformation, and institutional trust.
- How mega trends interact with one another.
- Trend analysis tools.

Readings

- World Economic Forum, *Global Risks Report 2026*.

Session 2 — Artificial Intelligence, Data, Automation, Cyber Risk and Quantum

Theme: AI as a general-purpose technology reshaping work, business, knowledge, creativity, and security.

Objectives

Participants will understand how AI, automation, data infrastructure, robotics, cybersecurity, and digital trust are transforming organizations and societies.

Key topics

- Generative AI and agentic AI.
- Automation of knowledge work.
- AI in decision-making, health, education, finance, logistics, and public services.
- Data as strategic infrastructure.
- Cybersecurity and AI-enabled threats.
- Digital trust, privacy, bias, and governance.
- The boundary between augmentation and replacement.

McKinsey's Technology Trends Outlook 2025 identifies 13 frontier technology trends with potential to transform global business, including AI-related developments, robotics, bioengineering, semiconductors, quantum technologies, and sustainability technologies. Deloitte's 2026 Human Capital Trends also highlights the evolving relationship between humans and machines, including AI's impact on decision-making and work design.

Readings

- McKinsey, *Technology Trends Outlook 2025*.
- Deloitte, *2026 Global Human Capital Trends*.
- A short case on Technology and AI

Session 3 — Climate Change, Energy Transition, and Resource Pressure

Theme: Climate and energy as the defining physical and economic transitions of the century.

Objectives

Participants will understand climate risk, decarbonization, energy security, electrification, adaptation, biodiversity, and resource scarcity as strategic issues.

Key topics

- Climate change and physical risk.
- Mitigation versus adaptation.
- Energy transition: renewables, electrification, batteries, grids, nuclear, hydrogen, and efficiency.
- Energy security and geopolitical competition.
- Food, water, land, and biodiversity pressure.
- Circular economy and sustainable consumption.
- Climate justice and unequal vulnerability.

The IPCC states that human activities have unequivocally caused global warming, with global surface temperature reaching about 1.1°C above 1850–1900 levels in 2011–2020. The IEA's World Energy Outlook 2025 examines energy futures through scenarios that connect energy security, access, emissions, technology, and policy choices.

Readings

- IPCC AR6 Synthesis Report summary.
- IEA, *World Energy Outlook 2025*.
- A short case on clean energy transition climate adaptation.

Session 4 — Geopolitics, Global Economy, Fragmentation and Supply Chain disruption and restructuring

Theme: From globalization to fragmentation, resilience, and strategic competition.

Objectives

Participants will understand how geopolitics, trade tensions, industrial policy, sanctions, supply-chain restructuring, and technological sovereignty shape the global economy.

Key topics

- Geoeconomic confrontation and economic security.
- Multipolarity and great-power competition.
- Supply-chain resilience and nearshoring.

- Strategic industries: chips, batteries, AI, defense, energy, food, and critical minerals.
- Sanctions, tariffs, export controls, and technology restrictions.
- The future of globalization.
- Risk management in fragmented markets.

WEF's 2026 risk analysis places geoeconomic confrontation, conflict, environmental risks, and AI-related societal impacts among the central issues facing decision-makers. The WEF Future of Jobs Report 2025 also identifies technological change, geoeconomic fragmentation, economic uncertainty, demographic shifts, and the green transition as major drivers reshaping labor markets by 2030.

Readings

- WEF, *Global Risks Report 2026*.
- WEF, *Future of Jobs Report 2025*.
- Short case on supply chains.

Session 5 — Demographics, Urbanization, Health, and Social Change

Theme: People, cities, ageing, migration, inequality, identity, and wellbeing.

Objectives

Participants will understand how demographic change affects economies, labor markets, public policy, consumer behavior, healthcare, housing, and social cohesion.

Key topics

- Ageing societies and shrinking workforces.
- Youth populations in emerging markets.
- Migration and urbanization.
- Fertility decline and family structure changes.
- Longevity, healthcare, and wellbeing.
- Inequality, polarization, and trust.
- The future of cities and infrastructure.
- Consumer shifts across generations.

The UN World Population Prospects 2024 provides official population estimates and projections for 237 countries or areas, based on historical demographic trends. Demographic change is also one of the macro forces identified by the WEF as reshaping labor markets through 2030.

Reading

- UN, *World Population Prospects 2024*.
- WEF, *Future of Jobs Report 2025*.
- Short case on ageing societies, urban growth, or migration.

Session 6 — Future of Work, Skills, Ethics, and Strategic Foresight

Theme: Pulling the mega trends together and designing future-ready strategies.

Objectives

Participants will synthesize the course themes and use strategic foresight tools to build future scenarios and action plans.

Key topics

- Future of work and skills transformation.
- Human-machine collaboration.
- Reskilling and lifelong learning.
- Organizational adaptability and trust.
- Ethics of technology, climate, inequality, and governance.
- Scenario planning.
- Strategic choices under uncertainty.
- Capstone presentations.

The WEF Future of Jobs Report 2025 estimates that labor-market disruption could affect 22% of jobs by 2030, with 170 million new roles created and 92 million displaced, producing a net increase of 78 million jobs. Deloitte's 2026 Human Capital Trends emphasizes adaptability, work redesign, trust, culture, and the human advantage in an AI-shaped work environment.

Capstone output

Each group presents a **Mega Trend Strategy Brief** covering:

1. Chosen organization, sector, city, or country.
2. Three to four relevant mega trends.
3. Main risks and opportunities.
4. Two possible 2030 scenarios.
5. Recommended actions for the next 12–24 months.

MATERIEL PEDAGOGIQUE / TEACHING MATERIALS

The course draws on a diverse set of contemporary teaching materials designed to expose participants to the most significant megatrends shaping the world today. Core materials include reports and insights from leading international organizations and research institutions, such as the World Economic Forum, McKinsey & Company, the International Energy Agency (IEA), the United Nations, Deloitte, and other reputable sources.

These materials are complemented by business cases, industry reports, articles, videos, and current events that illustrate how organizations, governments, and societies are responding to technological disruption, climate and energy challenges, demographic shifts, geopolitical developments, and evolving workforce dynamics. The emphasis is on practical, up-to-date content that enables students to connect theoretical concepts with real-world developments.

METHODES PEDAGOGIQUES / TEACHING METHODS

The course adopts an interactive and participant-centered learning approach that combines lectures, trend briefings, case discussions, individual reflection, group exercises, and scenario-based analysis. The course encourages students to critically evaluate emerging trends, explore alternative futures, and assess their implications for business and society.

Through collaborative discussions and experiential learning activities, participants will develop their ability to interpret complex global developments, identify strategic opportunities and risks, and formulate informed responses to uncertainty. Particular emphasis is placed on critical thinking, systems thinking, and the application of insights to real-world managerial and policy challenges.

BIOGRAPHIE(S) / BIOGRAPHY

Joseph is an Associate Professor EDT in the Information Systems and Operations Management department at HEC Paris. His teaching assignments include Supply Chain and Operations Management, Project and Innovation Management courses for undergraduate, graduate and executive programs at HEC Paris. He also serves as the academic director for various customized executive international programs and as a visiting professor at École Polytechnique, France where he teaches in the Masters in Energy Environment: Science Technology and Management (STEEM) program.

He holds a PhD in Industrial Engineering from Polytechnique – Montreal, Canada. He was part of the MINE (Managing Innovation in the New Economy) program, the largest social science research program in Canada. His research has been published in journals such as MIS Quarterly Executive and he has presented his work in information systems conferences such as International Conference on Information Systems (ICIS) and Hawaii International Conference on System Sciences (HICSS). He has been awarded twice the prestigious Syntec Management award in 2016 and in 2022.

Joseph is PMP certified and accounts for several years of business experience in consulting and technology management. He managed several large programs for major institutions in various industries in North America and Europe.

Sociopolitical Strategies in Emerging Markets

Teacher(s): Aline Gatignon

Duration (in hours): 18h

Number of ECTS credits: 3

Niveau / Education Level	Période / Period	Langue d'enseignement / Language of instruction	Effectif max / Max. class size	Mode / Teaching Mode
EXCHANGE	Intensives	English	48	In-Person

Prérequis / Prerequisites: None

SYNOPSIS / OVERVIEW

This course develops the analytical and leadership capabilities required to navigate politically and socially complex environments, with a particular focus on emerging markets. These contexts often combine high uncertainty, gaps in market-supporting institutions, and significant opportunities for value creation. Students learn to diagnose sociopolitical risks, identify key stakeholders, and design strategies that balance financial, operational, and legitimacy considerations. Through cases, debates, and an immersive crisis simulation, the course builds practical judgment for operating across sectors—including governments, NGOs, and communities—and equips students to design sustainable, resilient strategies that align organizational goals with societal expectations.

At the end of the course, students will be able to:

1. Analyze external and internal sociopolitical factors shaping firm strategy in emerging markets using stakeholder- and risk-mapping tools.
2. Evaluate stakeholder interests, power dynamics, and likely reactions to anticipate political and social risks under conditions of uncertainty.
3. Design strategic responses that integrate participatory engagement, cross-sector collaboration, and sustainability principles into organizational decision-making.

DESCRIPTION DETAILLEE / DETAILED DESCRIPTION

Principal Items

- Stakeholder mapping and risk analysis
- Participatory stakeholder engagement strategies
- Evaluation of stakeholder initiatives
- Organizational change and integration
- Cross-sector collaboration
-Crisis management

These components combine to build an integrated capability to diagnose sociopolitical risks and design cross-sector strategies in emerging-market contexts.

Organisation du cours – plan détaillé / Course organization – detailed outline:

Session 1: Introduction & Stakeholder Due Diligence
• Topics: Mapping the firm's extended sociopolitical environment; stakeholder analysis tools
• Readings: AES Telasi mini-case
• Deliverables: Stakeholder mapping poll demonstrating initial diagnostic capability

Session 2: Trust-Building and Crisis Communication
• Topics: Social license to operate; conflict drivers; crisis communication under uncertainty
• Readings: Tintaya Copper Mine; Rosia Montana
• Deliverables: In-class exercise + discussion poll connecting case insights to stakeholder legitimacy

Session 3: Cross-Sector Partnerships
• Topics: Cross-sector collaboration models; NGO and public-sector partnerships; organizational learning
• Readings: TNT & UN World Food Program & North Star Alliance mini cases
• Deliverables: Structured in-class debate assessing partnership tradeoffs, Partnership portfolio design

Session 4: Financial and Structural Integration
• Topics: Financial and organizational integration; link between structural choices and sociopolitical risk
• Readings: Natura Cosméticos
• Deliverables: In-class debate; application exercise for stakeholder mapping and integration

Session 5: Guest Speaker & Simulation Preparation
• Topics: Real-world application; simulation preparation (non-graded) ensuring role clarity for Session 6
• Readings: Guest speaker bio & SG Energy Simulation Briefing Document
• Deliverables: Q&A submission; simulation warmup exercise

Session 6: Simulation and Wrap-up
• Topics: Crisis strategy; stakeholder tradeoffs; integration of course tools
• Activity: Kerovka / SG Energy simulation; structured debrief
• Deliverables: Simulation performance; Individual Integrative Memo (in-class); Team CEO-style presentation

Contenus ESG / ESG-related Content:

Environmental-related content	Social-related content	Governance-related content
4. Extensive content	4. Extensive content	4. Extensive content

Objectifs de compétences / Competency Goals:

Transformative Management	Innovative Thinking & Problem Solving	Positive Leadership	Sustainable Business Practices
4. Extensive contribution	4. Extensive contribution	4. Extensive contribution	4. Extensive contribution

The course covers ESG dimensions extensively. Environmental issues arise through cases involving resource extraction and climate-related operational risks. Social dimensions are central to discussions on community relations, social license, inequality, and inclusive engagement. Governance considerations—including regulatory uncertainty, transparency, crisis escalation, and cross-sector accountability—are embedded throughout the cases and operationalized directly in the Kerovka simulation.

The course contributes extensively to HEC's four cross-disciplinary competencies. Transformative Management is strengthened through analysis of institutional pressures, crisis dynamics, and data-informed decision-making during the simulation. Innovative Thinking & Problem Solving is developed as

students diagnose sociopolitical challenges and design creative strategies under uncertainty. Positive Leadership is fostered through ethical reasoning, legitimacy considerations, and team-based crisis engagement. Sustainable Business Practices are deeply integrated through multi-stakeholder analysis, evaluation of environmental and social impacts, and alignment of strategy with long-term societal expectations.

MATERIEL PEDAGOGIQUE / TEACHING MATERIALS

All required readings, cases, and simulations will be provided via the course platform. These include:
- AES-Telasi
- Tintaya Copper Mine
- Rosia Montana
- Natura Cosméticos
- TNT & UN World Food Program
- North Star Alliance
- Kerovka / SG Energy Crisis Simulation

METHODES PEDAGOGIQUES / TEACHING METHODS

Case discussions, interactive lectures, group debates, and simulations. Students are expected to engage in participatory learning through polls, team-based exercises, and real-time decision-making. Accessibility: Students requiring accommodations (PSH) may request adaptations in line with HEC policies.

TRAVAUX ET ÉVALUATIONS / COURSEWORK & EVALUATIONS

Outil/support/mode d'évaluation Tool/method of evaluation	Durée et format Duration	Pondération dans la notation finale Weight in the final grading

STRATEGY AND LEADERSHIP IN PROFESSIONAL AND FINANCIAL SERVICES

Teacher(s): John Mawdsley

Duration (in hours): **18h**

Number of ECTS credits: 3

Education Level	Period	Language of instruction	Max. class size	Teaching Mode
M2 & MS & MsC	S2	English	40	In-Person

Prerequisites:

None

OVERVIEW

Most graduates of HEC Paris begin their careers in the professional and financial services (PSF) sectors: consulting, investment banking, business advisory, etc. While all students know the names of the largest firms, and some will have some professional experience inside these firms, most students do not understand *how* they function and *why* an understanding of the challenges leaders face can accelerate their career. How is value created? What are the kinds of strategic decisions leaders make and how are they interconnected? Do they even need to have a strategy? If you want to advance in these kinds of organizations, having the answers to such questions will set you apart from the rest.

Professional and financial services firms are unlike any other businesses. Their competitive advantage resides in the quality of their people, their interactions, the depth of client relationships, and the ability to turn individual expertise into collective performance. Understanding these dynamics allows you to see why some firms grow while others stall, why the best individual performers don't always become the best leaders, and why client relationships are strategic assets, not sales targets.

The course has two distinct elements: (i) concept introduction and (ii) application. Working in groups, each session first explores a distinct strategic challenge through a specially designed case, before groups assume the role of a management team where they apply what they have learned by making management decisions in a multi-session strategic simulation built around a single advisory firm. You formulate your decisions using whatever AI / software tool you deem appropriate according to the scenario, and the data you are provided with. Your management decisions build across sessions, culminating in a Board Decision Memo presented to the other “voting partners” in the classroom which tests whether you have built a strategy that coheres and is defensible.

LEARNING OUTCOMES

By the end of this course, you will be able to:

- Explain how professional and financial services firms function: the economics, internal structures, and strategic elements that separate successful firms from unsuccessful ones.

© John Mawdsley 2026. All rights reserved

- Evaluate the internal and external strategic challenges that these firms face in the same way, or better, than effective leaders do, and construct well-reasoned responses to them.
- Understand what it means to work inside one of these firms: how professionals are developed, how careers progress, and what really drives profit and performance.
- Make strategic decisions, defend them under pressure, and understand how early choices affect future strategic options.
- Develop a clearer view of which firms and roles fit your strengths, and what it takes to build a sustainable career once you join.

DETAILED DESCRIPTION

Key Topics:

- Positioning: What kind of firm are you?
- Economics: Can you afford to be the firm you want to be?
- Professionals: How do you turn individual talent into collective performance?
- Clients: What relationships make the strategy real?
- Governance: Who controls the firm and what happens when private equity wants in?

Course organization - detailed outline

Each session examines different topics that are fundamental to strategy and strategic management of professional and financial services firms.

This course is organized across 6 sessions. In the final session, groups present their Board Decision Memo. All readings and other material will be provided on Blackboard.

Session 1: Positioning: What kind of firm are you?

Strategy and competitive positioning:

- What makes PSFs different from other businesses, and why it matters for strategy
- How firms choose and defend a competitive position
- Identifying the external forces that create sustainable growth opportunities

Session 2: Economics: Can you afford to be the firm you want to be?

The financial and organizational logics:

- How PSFs generate revenues. and how that changes depending on the kind of firm you are
- The talent model as a strategic choice, not an HR decision
- What happens when the economics and the strategy point in different directions

Session 3: Professionals: How do you turn individual talent into collective performance?

Creating value through people:

© John Mawdsley 2026. All rights reserved

- Why talented individuals in PSFs systematically under-collaborate, and what it costs
- The organizational conditions that make collective performance possible
- Designing incentive systems that align individual and firm interests

Session 4: Clients: What relationships make the strategy real?

Managing client relationships as strategic assets:

- How to build and manage a client portfolio that supports the firm's strategic direction
- The tension between relationship depth and portfolio efficiency
- When external pressure forces a rethink of who your clients should be

Session 5: Who controls the firm and what happens when private equity wants in?

Financing, ownership, and governance:

- Why private equity funding is increasingly available to PSFs, and what it demands in return
- The fundamental tension between professional autonomy and investor objectives
- Choose between independence, merger, and private equity

Session 6: Board Memo Presentations

- Details to be provided in class

****

TEACHING MATERIALS

Case, readings, and other content are posted on Blackboard

TEACHING METHODS

This 18-hour course is taught using a mixture of case analysis, lecture, and individual and group exercises. Sessions are designed to be highly interactive. Where relevant, I introduce cutting-edge academic research into our discussion. Assessment is based entirely on coursework (no exam).

COURSEWORK & EVALUATIONS

The estimated preparation for each session should be no more than 1-2 hours, depending on your level of English reading skills. Workload will consist primarily of reviewing and thinking about the assigned material that we will examine in class. No additional preparation is required for in-class exercises.

On the final day, your group presents the board decision memo. You will be provided with a template that will assist you in producing a clear, concise, and well-argued strategy.

Only assigned material is required reading. The additional material, which features academic research and podcasts, is not mandatory, but it provides valuable background on specific topics and may help with your group presentation. It may also be of interest to those wishing to know more about the professional and financial services sector.

Method of evaluation	Format	Weight in the final grading
Participation (in-class discussions + 2 pre-class quizzes)	*Individual*	*40%*
Individual assignment	*Individual*	*20%*
Group Board Decision Memo	*Group*	*40%*

BIOGRAPHY

John Mawdsley is an Associate Professor and co-chair of the strategy and business policy department at HEC Paris, and Academic Director of the Master in Strategic Management. He received his PhD in Strategic Management from the University of Illinois at Urbana-Champaign. His primary research interests examine the drivers and impacts of strategy and performance in human capital-intensive firms relating to those firms' professional workforce and client relationships. His research has been published in Organization Science, Strategic Management Journal, Journal of Management, Strategy Science, and Advances in Strategic Management. John has also contributed to an edited book on the management of professional service firms. He sits on the editorial review board for Administrative Science Quarterly and Strategic Management Journal.

TECHNOLOGY STRATEGY: PLATFORMS, DATA ANALYTICS, & AI

Teacher: Matthew YEATON

Duration (in hours): 24h **Number of ECTS credits:** 5

Education Level	Period	Language of Instruction	Max. class size	Teaching Mode
M2 & MS & MsC	S2	English	30	In-Person

Prerequisites

The class will specifically build on key core Strategy concepts such as value propositions, diversification, network effects, the player analysis framework, and two-sided platforms. The class will also integrate material from Marketing, Managerial Economics, Business Analytics, and Operations Management.

OVERVIEW

This course provides an introduction to the strategic management of technology, especially with respect to platform strategy and artificial intelligence.

LEARNING OUTCOMES

Course organization – detailed outline

The course has three goals, which relate to the three modules of the course. The purpose of the first module, "Technology- based Competitive Advantage," is to understand how technology and digitization affect firms' profitability and growth. In the second module, "Technology Platforms and Network Dynamics," we will take a deep-dive on one of the most successful and lucrative business models to emerge over the past thirty years: the multi-sided platform. We will examine how firms utilize technology to harness network effects, use matching mechanisms to solve economic and social problems, and gain competitive advantage and capture value by doing so. In our final module, "Platforms & AI in Strategy and Society," we will explore how technology can solve some social and business problems but can also create ethical dilemmas. Specific topics and questions include but are not limited to the following:

- How should an incumbent firm respond to "disruptive" innovations?
- How can a mechanism design framework be used to design and analyze platform dynamics?
- How do firms leverage network effects to build sustainable competitive advantage?
- What are the optimal strategies for building multi-sided platforms?
- How can data and AI capabilities be used in technology and platform strategy?
- How do new technologies (especially AI) change the way we interact in society, and how should businesses respond?

ESG-related Content

Environmental-related content	Social-related content	Governance-related content
1. Minimal content	3. Significant content	2. Moderate content

Competency Goals

Transformative Management	Innovative Thinking & Problem Solving	Positive Leadership	Sustainable Business Practices
1. Minimal contribution	2. Moderate contribution	1. Minimal contribution	2. Moderate contribution

TEACHING MATERIALS

All cases, required readings, and videos will be made available via links in the Calendar section of the course website. There is no physical casebook for this course. There are a few optional books that you might find helpful as well.

OPTIONAL, BUT HIGHLY RECOMMENDED READINGS

- D'Aveni, Richard. 2018. The Pan-Industrial Revolution: How New Manufacturing Titans Will Transform the World. Houghton Mifflin Harcourt.
- Kearns, Michael and Aaron Roth. 2019. The Ethical Algorithm: The Science of Socially Aware Algorithm Design. Oxford University Press.

- McAfee, Andrew and Erik Brynjoslfsson. 2017. Machine, Crowd, Platform: Harness- ing our Digital Future. WW Norton.
- Stone, Brad. 2014. The Everything Store: Jeff Bezos and the Age of Amazon. Little, Brown and Company.
- Stone, Brad. 2017. The Upstarts: How Uber Airbnb, and the Killer Companies of the New Silicon Valley are Changing the World. Little, Brown and Company.

TEACHING METHODS

Case studies (predominant), simulations, case writeups, (optional) major open-ended project.

COURSEWORK & EVALUATIONS

Grading will be based on 1) class participation, 2) two case write-ups, and 3) an optional final project. These components are weighted in the following way to calculate the course grade:

Tool/method of evaluation	Weight in the final grading
Class Participation	*30%*
Class Write-up	*10%*
Autonomous Vehicles Assignment	*10%*
Data Analytics and Programming Assignment	*10%*
Optional Final Project	*40%*

Additional details

A student who only participates actively in class and does a good job on the case write-up and autonomous vehicles assignment can receive a maximum grade of B. Students who wish to receive an A must also submit an individual final project as described below in addition to the other requirements. There is no reason to do a final project unless you are going to put forth a serious effort on all components of the grade.

A. CLASS PARTICIPATION

Your participation is essential for both your own learning and that of other students. Because Strategy in the Age of AI is a case-based course, most of the learning will take place in our class discussion of these very cases. I expect that every student will arrive having done the required readings and able to answer the day's assignment questions. Students should also expect to be cold called in class. 30% of your overall course grade will be your participation grade, which is further decomposed into three components: 1) Poll question completion (10%), 2) Frequency of class participation (10%), and 3) Quality of class participation (10%).

Poll question: There is one poll question for each case and guest speaker in class (starting with session 2, and with the exception of session 4). Poll questions will be posted as assignments in your class website calendar. They require you to read the relevant case or article and give a short response to 1-2 questions. You must submit your answer to the poll question through the course website by midnight on the day before the relevant case or guest speaker is scheduled for class. If are you submitting a class write-up (see below) that addresses the poll question, you must still submit an answer to the multiple-choice question(s), but you may write "Please see write-up" in the short response section.

Frequency and quality of class participation: Both the frequency and quality of your class participation will be affected by non-attendance. Obviously, not coming to a class means that you will not have a chance to take part in class discussion, which is a critical component of your overall grade. In terms of the quality, the best class comments:

- Articulate a clear stance or argument
- Raise issues from past classes, current events, or other anecdotes that are relevant to the discussion
- Show curiosity and a willingness to experiment
- Use data, examples, or your own personal and professional experience to support arguments
- Are respectful when disagreeing by summarizing the contravening opinion before delivering your own

If you are comfortable with participating in class, I encourage you to help others feel safe about participating by inviting further discussion or referring to points that have already been made by your

classmates. Students are also expected to be present, prepared, and participate.

B. TWO CLASS WRITE-UPS

You must complete two write-ups in groups of up to three. Prepare a case write-up for sessions in which we discuss specific cases. A write-up should address either the "guiding questions" posted in your class website calendar about the case, or it can be a deeper analysis of the poll question posed for the class. Case write-ups should analyze and persuade rather than recite facts. Each write-up should not exceed 600 words, which is approximately equivalent to 2 pages at 12-pt Times New Roman font with 1-inch margins. Note: we live in the post-LLM era! The new baseline standard for all work submitted in this class is how much better it is than ChatGPT and how your write-up enables you to be a discussion leader in the relevant class session.

Each member of the group should submit the write-up on the course website.

C. AUTONOMOUS VEHICLES ASSIGNMENT

There is a data-related exercise that you should complete prior to our session on Autonomous Vehicles. The assignment will walk you through the process of analyzing a dataset collected from a survey of American adults about their attitudes toward autonomous vehicles. Your familiarity with the dataset and the insights you will glean from completing the assignment will form the basis of a discussion that we will have in class, so it is imperative that you complete the assignment. This assignment will primarily be graded on completeness.

D. DATA ANALYTICS & PROGRAMMING ASSIGNMENTS

There are a series of escalating data-related programming exercises that use a data analytics toolkit in Python to help you analyze and think through strategic business decisions. The assignments will start by simply introducing you to Python and scientific computing, and eventually walk you through a generative AI make vs. buy decision of the type that many firms are currently grappling. This assignment will primarily be graded on completeness and the quality of your insights derived from the analysis.

E. OPTIONAL FINAL PROJECT

The final project is for students hoping to receive an A in the course. However, doing a final project does not guarantee that a student will receive an A, and receiving an A also requires doing well in participation, the two write-ups, and the various data assignments.

For the final project, I ask that you analyze and evaluate a particular strategic decision or (set of decisions) facing a company or industry using the concepts from the course (essay form, 1,800 word limit, including all exhibits). While providing some details is necessary, you should emphasize analysis over description. Do not use cases covered in this course or other courses at HEC Paris. You are welcome to make use of industry contacts. Discussing your topic with me in advance is advised but not required.

Subject to update

SYNOPSIS

Money is being reinvented. From central bank digital currencies and blockchain networks to fintech platforms transforming payments, our financial systems are undergoing one of the most profound changes in modern history. This course explores the emerging architecture of digital money – its technologies, business models, and regulatory frameworks – through a multidisciplinary lens combining economics, technology, law, and strategy. Students engage directly with real-world cases and industry experts from both the public and private sectors to understand and shape the future of finance.

DETAILED DESCRIPTION

Prerequisites: n/a

Course overview:

Digital transformation is reshaping how money moves, who controls it, and how value is created. This course examines the rapidly evolving world of digital payments, cryptocurrencies, and financial innovation, combining regulatory insight with technological and strategic perspectives.

Key topics include:

- Regulatory and compliance frameworks (E-Money, PSD2, MiCA, and emerging digital finance regulations)
- Core technologies such as distributed ledger systems, cybersecurity, and digital identity
- Central Bank Digital Currencies (CBDCs) and stablecoins as new forms of sovereign and private money
- PayTech strategy and innovation, from real-time payments to embedded finance
- The role of governments, central banks, and global payment platforms in shaping the next monetary ecosystem

Students will engage with these issues from multiple viewpoints – including startups, central banks, technology firms, and established financial institutions – to build a holistic understanding of the payments industry's transformation.

Principal items:

- Digital Payments and Financial Infrastructure
- Cryptocurrencies and Digital Assets
- Innovation and Strategy in PayTech
- Policy, Regulation, and Compliance
- Blockchain, Smart Contracts, and Trust Systems

Pedagogical Objectives:

By the end of the course, students will be able to:

- Understand the forces driving digital transformation in the payments sector.
- Explain the infrastructure and technologies that enable digital money and crypto assets.
- Evaluate regulatory and policy responses to innovation and their impact on market dynamics.
- Analyze the interplay between technology, strategy, and governance in the global payment ecosystem.
- Develop creative and practical solutions to emerging challenges in digital finance.
- Think critically about the ethical, social, and policy implications of technological change.

Skills:

- Industry foresight: Analyze key trends reshaping finance and technology.
- Regulatory fluency: Interpret and apply legal frameworks (PSD2, MiCA, etc.) in real-world contexts.
- Interdisciplinary synthesis: Connect insights across law, policy, technology, and strategy.
- Innovation strategy: Design and evaluate technology-driven business or policy initiatives.
- Collaboration and communication: Work effectively in teams to produce case analyses and persuasive presentations.

Course organization - detailed outline:

Session 1 - Introduction: The Role of Money in Society and Central Banking

The goal of the introductory session is to explain the basic concepts of money, fundamental technology concepts, as well as the philosophical ambiguity of money. We will discuss the role of central banks in issuing and handing money, and notions of private banking and money issuance. This session also dives into understanding the role of digital payments in society, economics, and business is crucial. Analysing current and future trends in technology, regulations, and business models provides insights. This understanding enables a proactive analysis of the evolving digital payment landscape, identifying both threats and opportunities for informed decision-making.

Topics

General introduction to the concept of money, the underlying technologies and the issuing authorities:

1. Concept of money: Why was it invented and what purpose does it serve?
2. Ecosystem innovation overview: Who is playing which role in the world of money?
3. Relevance of digital payments: what has stimulated the growth of digital payments and why they are important for society, economics and business

Last year version
Subject to update

4. How digital payments work: how today's most prevalent digital payment instruments work and an overview of the current main players in the payments industry, including their roles and business models (e.g. Visa, Mastercard, Banks, Payment Processors, Acquirers, PayPal, Alipay)
5. Payment business challenges: Evolving customer needs and use cases. From simple POS devices to frictionless payments, embedded finance, BNPL.
6. Payment technology: an overview of core technology enablers behind digital payments, both from the front-end user experience perspective (e.g. NFC, QR codes, biometrics, mobile, connectivity) as well as for back-office payment processing (e.g. blockchain, AI). Cyber defence end resilience.

Session 2 - Digital Money & Blockchain: Infrastructure, Technology and Security – and Crypto-enabled Transactions

Understanding digital payments, blockchain technology and its underlying concepts and infrastructure, as well as regulatory and risk considerations.

Topics

Explore key concepts of blockchain technology and understand how it differs fundamentally from other technological advancements:

1. Cyber security & governance: How are cyber security and governance aspects applied to all blockchain technology solutions?
2. The stolen wallet": Why do crypto exchanges have such a dodgy reputation and how can someone steal a wallet?
3. The blockchain trilemma: Can the three key pillars of blockchain - decentralisation, scalability, and security - co-exist?
4. The Diem ambition: How Facebook tried to issue their own money with the ambition to develop a truly borderless currency – and the regulators' responses.
5. A Swiss case study: The success of Twint – how a domestic payment scheme achieved 50%+ adoption rate by focussing on solving actual customer problems.

Session 3 - Company Visit: Innovation and start-ups in the future of payments

Exploring key trends in innovation, co-creation, and collaboration between established players and emerging companies or start-ups. The session will also delve into product innovation to identify the types of new offerings driving the payment industry.

Topics

1. Emerging Payment Technologies: Innovations such as real-time payment systems, click-to-pay, and AI-driven payment solutions.
2. Collaborative Ecosystems: Partnerships between fintech start-ups and traditional financial institutions.
3. Product Innovation in Payments: New services like Buy Now, Pay Later (BNPL), digital wallets, and subscription-based payment models.
4. Customer-Centric Solutions: How user experience design and personalization drive adoption in the payment sector.

Session 4 - Case Study: Consolidation of the PayTech Industry and New Challenges with Digital Currencies.

This session explores a case study on the consolidation of the PayTech industry, examining the key drivers behind mergers and acquisitions, market shifts, and competition. It also delves into the challenges and opportunities presented by Central Bank Digital Currencies (CBDCs) and other digital currencies, focusing on their impact on the PayTech ecosystem and the future of digital payments.

Topics

Last year version
Subject to update

1. Global PayTech Consolidation Trends: Analysing key mergers, acquisitions, and partnerships shaping the global PayTech industry.
2. Challenges and Opportunities of CBDCs: Examining how Central Bank Digital Currencies are transforming payment systems and their integration with traditional financial infrastructure.
3. The Rise of Digital Currencies: Investigating the adoption of cryptocurrencies and stablecoins and their impact on PayTech services.
4. Digital Payments in Europe: With an emphasis on the European market, this topic explores how regional regulations, like the EU's MiCA (Markets in Crypto-Assets) framework, are influencing the development and adoption of digital currencies and payment technologies.
5. Innovation in Digital Payment Solutions: Exploring how PayTech companies are driving innovation in digital wallets, cross-border payments, and real-time transaction systems globally.

Session 5 – Regulation and Policy

Introducing the taxonomy of crypto assets and their regulatory implications, as well as relevant consumer protection aspects. In addition, national regulatory strategies and approaches to digital finance and the crypto industry will be introduced and presented.

Topics

Framework to differentiate crypto assets and determine their regulatory implications:

1. Taxonomy: How to distinguish different crypto asset classes?
2. Financial instruments: What kind of other investment opportunities generate exposure to crypto assets (e.g. ETFs, crypto stocks)?
3. Effects of cryptos: How do crypto assets lead to a market-driven regulation?
4. Regulatory challenges: How do regulators tackle the upcoming challenges from crypto currencies and assets in relation to know-your-client (KYC), anti-money laundering (AML), anti-terrorist-financing, and tax evasion?
5. What are CBDCS and the Digital Euro?
6. What is the proposal for a regulation of the Digital Euro and what are its key considerations and trade-offs?
7. What would be the role of other payments actors in the context of the digital euro?
8. The Future: What is the financial data space and how will it shape money and payments in the coming years?

Session 6 - Discussion of case studies and conclusion

Session 6 focuses on analysing case studies and drawing final conclusions, consolidating key insights from the course.

TEACHING MATERIALS

Digital Resources:

Materials will be made available on Blackboard in due course.

TEACHING METHODS

The course includes a mix of lectures, expert guest speakers, company site visits, and group-based case studies.

WORK AND EVALUATIONS

Last year version
Subject to update

Work requested:

Course evaluation will be based on group case studies and an individual assignment, which will involve critical analysis of selected material presented by key players in the payments industry.

Assessment of achievement:

Tool/method of evaluation	Duration	Weight in the final grading
Group case study	*10h group work*	*70%*
Individual assignment in class	*4h individual research*	*30%*

Additional details: Students will work on exercises and assignments during class and be guided by the instructors; feedback may be provided through group presentations.

BIOGRAPHY

A bibliography will be provided prior to the first session.
